Visionary Transcript Utility Standardize Transcripts

Visionary Transcript Utility is the Swiss army knife of transcript production software. It enables agencies to normalize and standardize rogue text transcripts in order to create industry-standard, properly formatted Amicus-type ASCII text files. This allows easy movement through the production process and enables smooth importation into other softwares, including Visionary software such as the Auto-Syncer and V-Print. It is an invaluable piece in any shop's production tool set.
