## Visionary Viewer Review Synchronized Deposition Transcripts and Associated Exhibits

Package the synchronized video deposition together with the exhibits for your clients to review, import into trial presentation software or present directly in court.

**Visionary Viewer** comes free with Visionary Auto-Syncer. Transcripts can be easily searched or you can make selections from the keyword index. When exhibits are packaged with deposition transcripts, the document list will display a list of scanned documents. OCR documents may also be incorporated with the deposition. Portions of the text selected from the transcript may be placed into a clip list for fast, easy designation editing.
